has shown an increase over its predeces-The total value of the trade of Mengtsz during the year amounted to Hk. Tls. 2,259,494, cent, over the figures of 1892. We can hardly suppose the trade would have shown this satisfactory increase had it not been for the facilities afforded by the issue of transit passes. While the Kwangtung authorities are determined not to allow the transit pass system to be established in that province, in Yunnan the provisions of the treaty with France upon this subject are faithfully observed. The value of goods sent into the interior from Mengtez last year under transit passes amounted to Hk. TJ. 1,243,668, or almost 82 per cent of the quantity imported, and the passes covered goo a to 122 places. The returns show that the trade is capable of great expansion. It already exceeds in value that of several of the treaty ports, and with improved transport facilities a rapid increase may be looked for. A small steamer slready runs on the Red Biver to Lackai, but it carries only mails and passengers. A contract has, buwever, been made by the French Government with Messrs. MARTY and D'ABBADIE for a weekly service to commence in September next, and the vessels to be then put on the line will no doubt be cargo carriers. It will then be possible to send cargo from Haiphong to Mengtez in from twenty to thirty days, whorens the time now taken over the trip ranges from fifty to eighy days. With steamers, too, says Mr. Carl, a system of insurance would no doubt follow, and trade could be conducted on a fairly safe basis. Most of the trade of Mengtsz is conducted with Hongkong, and the flourishing state of preciated by those interested in it. A good advantageously served by the West River if goods by the latter route were allowed the West P" munication the West River is more favourable for it than the Red River, at all events the Kwanglung authorities in allowing a

The PRESEDENT -I would remind members that at the law meeting but one of this Brurd a do not know whother members have changed.

Me, FRANCIS-I think the Intention of the members was to refuse it for the time being. The PRESIDENT - Exonse me, the question was brought up at the last meeting, when Mr. Leigh wished the minutes to be altered; the members were consulted as to their recollection of what was done, and they istated that Ithe application was refused point blank

Mr. FRANCIS-In so many words, but I think the intention of the meeting was that it should be refused pending the reconsideration of the

The PRESIDENT-Tonly mention it to show the intention of the Board and so that we should not do anything inconsistent. Mr. LEIGH-I should like to say a few words Up till a very recent meeting of this Board it would appear that all applications for water closets if made in proper form were granted. Now. I wish to point ant what this would mean in the long run, as I cannot think the members of this Board have given the question the consideration it deserves. As far as I cen ascertain there

are at present comething like 200 water closets in use in the Colony, a number of which, however, have never been sanctioned by this Board. The PRESIDENT-Are you speaking to a mo Mr. Lung-I am speaking on a very definite

The PRESIDENT-What is your motion P Mr. LEON-I am going to propose "That this and all other applications, for W.C.'s be refused for the present, and that a Committee of three be appointed to generally consider the question of W.O.'s and recommend on what donditions all such permits should be granted in future." As I was saying, there are about 200 W.C.'s in use in the onlony at the present time. Many of these closets are situated la botals. into public latrines, and so the thing would go on. Now, in the first place I assert that if the

exercts from a population of 1920,000 persons is poured into the harbour it will be a most dangerous propeding from a sunitary point of view and the only remedy would then be to put in a large intercepting sewer running the catira laugth of the City and carried out to a pumping station some miles out \$22,800 which is paid annually for the privileg of removing the ught soil, which sum, am of opinion, could be materially increased by the erection of proper public lattines, which a a work the Government ought to put in hand at once. There is also another very important question in connection with the granting to all of water closets, and that is the question of water. The usual flushing bank in this Colony contains two gallons, but from recent experiments at home it has been found that this quantity in insufficient to oronte a proper flush,

lends the to the conclusion that the house drains and ashister, engineers are now recommending contain not less than four gallons, but even injurious, to health. I have the honour to taking the size at present in use in the Colony of two gallons and fallowing that for one reason or abother it is used twice levery iday for every person multiply this by the 365 days in the year and by the population of 221,000 Inhabit-THE ALTHOUR REISANCE AT CAUSEWAY DAY. ants we have the end would amount of 321 million It will be remembered that at the last meeting gallons, used yearly for W.C's only or of the Board a late of the and from Mr. D more than the entire contents of the Tytana Kennedy longics managering constraing the reservoir, and this when our mater supply is ininsanitary condition of the neighbourhood sufficient for the requirements of the place with around his stables at Causeway Say. The Board only 200 W.C.s in uso. These figures agreed that the Acting Superintendent should are of course based on the assumption visit the spot and report on the condition of that the entire population is using W.C.s. things Mr. Ram's report was to the effect that but they will suffice to show how important the source of the nuisance complained was some this question is morely looking at it from a hand known as Jardine's gardons occupying an question of water supply. I therefore beg to

Mr. FRANCIS-I second that motion. I williams if did not find that there were think that the arguments of Mr Leigh are very had no doubt that most of the night soil and the pressing his willing mas to comply with the The manure pit was o ctainly off-usive to any and in time by far the greater portion of the one standing close by and the general drainage town houses would be found to be furnished arrangements were very defective and insanitary, with water closets. I think it is a perious The general opinion he formed from two visits constion, whether under any diroumstances to the loos ity was that although there was it is advisable to allow night soil to go into the much that could be mous dered objectionable public drains, whether in this climate and in SURGEON-MAJOR JAMES submitted a minute there was nothing which constituted an insanitary this colony the bucket system, with all due precontions taken of course, is not far and away the On the circulation of this report the following best. The system it dissergeable, but it has worked extremely wall. It brings us in a Sargeon-Major James - During this epidemie ha- large revenue, and if water closets are to be man manute may charge to consumers of vegote | p. rmitte! those water | olesets must necesusion, but as a goneral rule I think that the aso of parily be connected with the separate system. near sewage farms at home suffer in he ltir. The uight soil must be taken into the harbour or Surgeon James -In answer to Dr. Hartigan's remark, neighbourhood of swampr grounds may constitute a provision made for its removal from the colony danger. The house are not complained of but might in some other way, and the quantity of water necessarily expended on the system is far beyond anything that the solony line it in its power to aupply. To give you one illustration. One of the limitations and rules laid down for the water supply gives five gallons a head. Suppose appliesio comes in the erapt water closets in Chinase nouses where the Water Authority has fixed the limital ave gallons per head per day-why more

than ine whole of that would be necessary to flust the water closets. The Parsidant The Chinese never use Mr. Francis -They probably would. The Parsident-So firms I know, none of

the Chinese have shown any desire for water-The Passident-From the minutes it appears Mr. Fasnois-It. is not a question of the that the majority of the members agree that Chinese merely, but it is a question of people building houses for Chinese and having water-Dr. H. RTICLE-I wish to ask Mr. Ram who closets put in. For many reasons people building ther when he visited those houses, which on my Chinese houses of a superior class would put them culting the uttention of the Board to he was in Of course if would certainly obviate the auked to visite to tound them in an insanitary great difficulty we have to provide for the female population. Libiak it is extremely likely that a The President Mr. Ram's nuswer is that very great many applications would come in. We the houses are in an insanitary condition. The must either how lay down rules and regulations. question now before the Board, however, is or say that we will not grant permission to have whether a haistuce is occasioned by using this watercloset. We may allow them at Hotels, publio institutions, achoois, &c., but we may draw the Mr. E. Andrs - My opinion is that there is no line and my wearen't permit them to Chimes. Mr. Leigh's motion is not, as I understand it, The Pars Dant-Di members agree that that no more water closets be allowed to any one thora is no nuiscoce caused by this vogetable but that before we go any further and grant any more applications, we must decide on certain

climate and more especially when you have and it would be a very great danger if we are told by Mr. Ram that they are in an ing into the Harbour le suother thing. If you get the Harbour poisoned it is bad business,

SURGEON MAJOR JAMES - I think the earth

dists penerally introduced here. The Colonial Sungeon-I think the water closet should be the exception and confined THE WATER CLOSET P. THE BUCK T SYSTEM | antirely to public baildings. For myself I can Application was received from Messra. D. Sas only sav that I would not live in a house that

difficulty of the water apply somer or later and

there should be no objection on that score. Dr. HARTIGAN-In answer to Mr. Tooker ! ed and a periodical flu shing at all seasons of the year | should like to say that in 1885 I took a great interest in the separate question, and I urged Mr. Rell-Treing, who was a momber of the Legislatire Council, to raise the question. He did so in next meeting on the general question of water close's a sort of way and the draine a system. was corried. But at that time we had a memo. from the then Colonial Secretary, Dr. Stewart. to the effect that the separate system was not intended to bring on the introduction of water closets. It would be rulention. We have been protty from from typhoid, and if you have the water closet system you will choke all the drains and you will render them much more foul than at present. To say that we have water enough to flash water closets is, I think, absurd. I speak in answer to Mr. Tooker, who seems to think that the water closet is the paupaoen for all our ille. The Acrive Director of Pentic Works

-No. no. 1 didn't say that. Mr. LEIGH-I propose that a Committee consisting of Mr. Francis, Surgeon James, and mysolf, be appointed. Hon. Ho Kat - I bog to second that;

Mr. PRANCIS hid on the table two reports which the Permanent Committee had made to the Government. MORTALITY STATISTICS.

The mortality roturns for the wook ending July 7th showe La douth rate of 40,6 as against 30 3 for the corresponding period of last year. AIJOURNMENT. The Board then adjourned.

## THE PERMANENT COMMITTEE AND INSANITARY DWELLINGS.

The following letters from the Permanent Committee to the Government were laid before the Sanitary Board yesterday :-Permanent Committee, Sanitary Board,

Hongkong, 28th June, 1894. tary Board have the honour to report, for the made applicable forthwith to every existing information of His Excellency the Governor, house in the colony, and that the Sanitary that in the exercise of the powers outrusted to Board be provided, to commence with, with a them by law for the prevention and mitigation sufficient staff of Sanitary Inspectors (sixteen of the plague, they have condemned as unfit for at the least or one for every 500 houses) to ouhuman habitation 384 houses in the worst part force obedience to these regulations, with of Taipingshan, have removed the inhabitants adequate powers to enter and inspect. with their furniture and offects to other portions | The Permanant Committee would like to see of the city, and have walled in the entire district a provision in any Ordinance to be passed. repending the decision of the Government as to the out-offices and servants quarters of every

Eully fifty per cent, of the cases of plague once at least in every quarter. that had occurred to flongkong up to the date; These recommendations of the Permanent within its limits. A large number of bouses ledge they have obtained during the last seven (76) had had more than three cases of plagoe; 146, weeks from observation and report as to the houses bad one or two. Many of the houses are sanitary condition and defects of Chinese houses small, old, dark, badly drained and ventilated, of all classes, and they beg to enbeit for the and filthily dirty, and have been certified by a very serious consideration of the Gavernment duly qualified medical practitioner to be in their the following statement of these defects, and of district itself is very bidly laid out and werse offective and thoroughly practical

nonumulated deposits of many years. its degree, nor do they say that all the houses remedied without a moment's dolay and at any ine aded within the limits of the district propin cost to judiciduals or to the Colony. Until it is the neighbourhood from being a source of dan- the City hearly equally bad which may have to ger to the entire city.

The Committee therefore recommand :-(1)—That the whole area (including streets), about ten acres, be resumed by the Government, paying compensation to owners and others interested according to their reapective interests.

(2)—That the whole of the buildings on the ground be destroyed, preferably by fire, 3)-That the entire area be dug over, old | drains opened up and removed, and all sewage saturated soil got rid of, the ground laid out ! afresh for building purposes with wider and better streets, and a complete system of drainage more suitable than the old for the requirements of a Chinese population; and (4) - That the whole, when so laid out and redrained, be put up for sale by public auction. in lots or otherwise:

The Committee do not think that the Govern- opening leading under the floor inside the walls convict him. mout will be in may way out of pocket by the of any Chinese house, and the requirement of an operation, which will take probably two years The Committee suggest that the resumption | Chinese house. of the land be by Ordinance, at one stroke; that | This remedy can only be applied, to its fall by the same Ordinance a Commission of three extent to bouses to be hereafter built, but the be appointed to earefully inspect and report on impervious floor can and ought to be enforced the condition of the houses and to value each in every house of every description in the Colony separately, upon the basis of the average assessed and at once.

laying out afresh may be proceeded with at houses shall pass to the publicis wers in the commond-that no stroits or lanes (other than the contribute largely to the better lighting and Rolmen, appeared for the plaintiff, and Mr. J. J. them to attend at the Court at the sacrifice scavenging lanes hereinafter meationed be par ventilation of house; want of adequate light Prancis, Q.C. instructed by Mr. E. J.
